

FOX POINT WEEKLY UPDATE (5/4/20 to 5/8/20)

Barnett, View, and Acacia Update:

- On May 4 – The contractor, Wood Sewer & Excavating, continued water main installation on Barnett Ln. north of View Pl. and on View towards Lake Dr.
- On May 5 – Wood finished the water main on View and continued north on Barnett
- On May 6 – Wood finished water main on Barnett near Green Tree Rd. One crew began services near Barnett/Lake. There was an issue with an existing water service, causing the need for an emergency shutdown of the main for repair. The crew finished the repair and replacement of the water services late that evening.
- On May 7 – Wood began water main installation on Acacia and continued water service connections on Barnett.
- Wood was not on-site Friday, May 8. They do not plan on working most Fridays.

A Look Forward: Week of May 11th

- Wood will continue water services on Barnett south of View
- A segment of the new water main was sampled and tested for coliform bacteria Friday, which is required for all new water mains. If the segments pass, the main will be pressure tested and then put into service. Wood can then begin replacing any water services south of 6941 Barnett.
- Wood will continue water main installation on Acacia and likely sample and test late in the week
